SKILLS

Backend: Node.js, Express.js, REST API Design

Database: MongoDB

Auth & Integrations: JWT Authentication, Authorization (RBAC), Razorpay, Cloudinary, EmailJS

Frontend: JavaScript (ES6+), React.js, Redux Toolkit, Zustand, Tailwind CSS, HTML5, CSS3

Tools & Platforms: Git, GitHub, Postman, Appwrite, Vercel, Netlify

PROJECTS

JJ Store — Full-Stack Ecommerce Application

[Live](#)

Node.js, Express.js, MongoDB, React, JWT, Razorpay, Cloudinary

- Designed and built a REST API with 15+ endpoints in Node.js, Express.js and MongoDB covering authentication, products, cart, addresses and orders.
- Implemented JWT authentication with email verification, and role-based access control that restricts product create, update and delete to an admin role.
- Designed MongoDB data models for products, carts, addresses and orders, and built order status tracking.
- Integrated Razorpay for online payments and Cloudinary for product image upload and storage.
- Built the React client that consumes the API for authentication, product browsing, cart and ordering.

Megablog — Blog Platform

[Live](#)

React, Appwrite, Redux Toolkit, React Hook Form, Tailwind CSS, TinyMCE

- Built post CRUD (create, edit, delete, browse) with Appwrite authentication and a personal dashboard scoped to the logged-in user.
- Enforced ownership-based access control by comparing post author ID to the session user ID, gating Edit/Delete actions and dashboard data.
- Structured the app into 12+ reusable components, including a single PostForm shared by create and edit flows, with Redux Toolkit for application state.
- Added a TinyMCE rich text editor with image uploads and dynamic slug generation for clean, shareable post URLs.

EXPERIENCE

Web Developer — Punyoday Trust

July 2023 – Jan 2026

Fatehpur, India · React, JavaScript, EmailJS

- Sole developer of a production React website for 2.5 years, owning maintenance, troubleshooting and releases with no other developer.
- Shipped 20+ feature and content updates to the live site directly from organizational requirements, without a PM or written spec.
- Built form-based data collection workflows used across 15+ events and for organizational data.
- Integrated EmailJS to automate email delivery on form submission, including auto-reply confirmations so users received instant acknowledgment.

Frontend Developer Intern — iNeuron Pvt Ltd

Jan 2023 – Feb 2023

Bangalore, India · React, React Router, Zustand, Tailwind CSS

- Built a responsive e-commerce frontend with product listing, detail and cart flows, integrating FakeStoreAPI for categories and product data.
- Managed cart state with Zustand to keep UI updates consistent across the shopping flow.
- Built one reusable product component driven by URL search parameters and dynamic data loading, serving all category and product views without duplicated pages.
- Built the UI and page structure of a resume builder in a 2-person team, including dynamic forms that populate the selected template in real time.

EDUCATION

Bachelor of Computer Applications — Lovely Professional University

Diploma in Computer Science — Allahabad College of Engineering & Management
